

THIN FILM TRANSISTOR LIQUID CRYSTAL DISPLAY AND METHOD FOR  
MANUFACTURING THE SAME

ABSTRACT OF THE DISCLOSURE

There is provided a reflection type/transflection type thin film transistor liquid crystal display, including an insulating substrate, a thin film transistor formed on the insulating substrate, a transparent electrode made of indium-tin-oxide formed on the thin film transistor and electrically contacted with a source region and a drain region of the thin film transistor, and a curved conducting structure with an inclination of 3 to 20 degrees formed on the transparent electrode.
